Intermediate Structural Engineer – Building Design

Description

Are you the **structural expert** we're looking for?

DPHV is a specialized consulting engineering firm that has been providing professional and technical expertise in structural engineering for over thirty years. Our team's experience and know-how have earned us an excellent reputation in the industry. In other words, we offer the technical agility of a large firm, but the **flexibility** and **humanity** of an independent firm! When you join our team, you get the best of both worlds!

Our office is located in **Laval's Sainte-Dorothée district**.

Your **advantages** in joining our team :

- Salary commensurate with your professional experience on an hourly basis – so every hour worked is paid or can be taken as additional time off
- Annual leave and sick leave;
- Flexible working hours to reconcile work and personal life
- Group insurance program including life insurance, short- and long-term disability, drug and paramedical care and travel insurance for you and your family
- DPSP program – employer-sponsored plan that allocates a portion of company profits to employees through a registered savings plan
- Remote working policy with equipment reimbursement program
- A stimulating work environment that relies on the versatility of team members
- Ongoing training program
- Career development opportunities – coaching and mentoring program
- Reimbursement of professional dues
- Social events throughout the year
- Free office beverages and snacks
- Jeans Friday every day
- Free on-site and/or nearby parking

Your **profile**:

We are looking for a versatile and intermediate structural engineer to join our dynamic team at DPHV.

Your responsibilities will include designing steel, reinforced concrete and wooden structures in accordance with current codes and regulations, in collaboration with our design and engineering team. You will also participate in the detailed development of plans and specifications, as well as in the production of technical reports.

We are looking for a versatile person, capable of effectively managing numerous projects simultaneously.

- Strong interest in both calculations (design) and project management
- Intellectual curiosity
- Sense of customer service
- Versatility
- Excellent time and priority management
- Team spirit, attention to detail and organizational skills

Your main responsibilities

- Perform the **design and project management** of various steel, concrete and wooden building structures in commercial, residential, institutional and industrial projects;
- **Supervise the** preparation of plans and specifications with the modeling team;
- **Ensure the** administrative and technical management of customer accounts;
- Carry out surveys of existing installations when required;
- Write technical expert reports.

Your **qualifications**:

- BAC in civil engineering or building engineering with a specialization in structures
- Master's degree in structures (asset)
- Member in good standing of the Ordre des ingénieurs du Québec
- At least 5 years of relevant experience – experience in the field of consulting engineering in Quebec will be considered an asset
- Valid ASP card
- Must have a driver's license and access to a vehicle for work-related travel (asset)
- Knowledge of ETABS, SAP and SAFE software
- Team player, resourceful, able to work independently and well-organized
- French, spoken and written (compulsory)

The experience, dynamism and know-how of our team members create an environment conducive to learning, and everyone's contribution enables us to imagine and design concrete, innovative solutions for our customers' various projects. Join our passionate team!

An idea, a plan...a CAREER!

Does this challenge stimulate you? Send us your application without delay by clicking on the "apply" button, by sending us an e-mail at dphv@dphv.ca or via our job module on our website at www.dphv.ca.

Thank you for your interest in DPHV. However, only selected candidates will be contacted.
